

Role Description Statistician

Schain Research is a Stockholm-based research consultancy company specialized in health data sciences and real world evidence to support pharmaceutical companies throughout all phases of drug development. We advance knowledge and contribute to accelerated drug development processes, evidence based healthcare and improved patient outcomes by applying advanced analytics on population-based data sources. We are growing and are now looking for a talented statistician with experience in observational studies to join our passionate team.

Core responsibilities

- Provide statistical expertise in study design and throughout complex research projects
- Statistical programming and advanced data analysis
- Develop study protocols, statistical analysis plans, statistical reports and contribute with statistical expertise in publication related work

Required experience

- PhD degree in biostatistics, mathematical statistics or similar
- Experience in working with national Swedish registries held by Socialstyrelsen and/or SCB

Other qualifications/personal profile

- Strong interpersonal skills and ability to efficiently work in cross-functional teams
- Strong communication skills in English, verbally and in writing
- Proactive way of working and ability to manage multiple projects simultaneously
- Experience with analysis tools such as R
- Experience in oncology is a merit but not required

Job location

We are located in Stockholm, Sweden: c/o Norrsken House, Birger Jarlsgatan 57C and Grönviksvägen 14.

If you have any questions or want to apply for the role, please send your CV to CEO Frida Schain at frida@schainresearch.com or call + 46 72 330 5313.

We advance knowledge to accelerate patient access to medical innovations
